ABOUT ODISHA WATER ACADEMY

With a view to strengthening training and capacity building of engineers & practitioners in the field of water and wastewater sector, Govt. of Odisha, under the aegis of Housing & Urban Development Dept. and Water Corporation of Odisha (WATCO) has set up the 'Odisha Water Academy'.

The setting up of the Academy is in sync with the vision of establishing a 'Centre of Excellence' to strengthen learning ecosystem to facilitate dissemination and exchange of knowledge, leading industry practices, documentation, action research and advocacy.

At the Academy, we are

- Committed to enhance the quality and levels of services leading to customer satisfaction in the water and wastewater sectors.
- Equipped with excellent training infrastructure and competent and experienced experts and professionals to design & deliver training courses modular in nature, tailor-made for all levels, from workers/engineers to top management in the entire value chain.
- Focused on wider spectrum of urban development curriculum including 24X7 water supply management, faecal sludge & septage management, sewerage system management and solid waste management in professional partnerships with Institutions of global repute.

OBJECTIVE

To train and build the capacity of the workforce and stakeholders with a view to enhancing their knowledge & skills (actual know-how), keeping them abreast of the avant-garde technologies and enabling them to stay updated with innovative and advanced management skills to run water and wastewater services effectively.
